

## **-: Future Plan :-**

The institution aims to preserve the achievements of recent years and further develop the ambience of knowledge, culture and wisdom among the locality. Our erudite faculty members are headstrong to disseminate the light of education into the farthest corner of civil society by obliterating any slender trace of ignorance and darkness. We are hopeful to build a new generation of well-bred and enlightened students who would be in service of the nation. Moreover, we are trying to begin honours courses in the subjects of science stream (like Physics, Chemistry, and Mathematics etc.). The college authority also intends to start master's programme in several humanities disciplines like English, Bengali, History and others. A gymnasium for both the students and teachers is likely to be constructed.
